Management Commentary

“In June, Bitdeer made substantial progress in advancing our strategic initiatives in Bitcoin mining and HPC and AI,” stated Linghui Kong, Chief Business Officer of Bitdeer. “We entered into a 30-year lease agreement with Monroe County Port Authority for 570 MW of ready-to-use power infrastructure. This deal increases our total global contracted power capacity to 2.5 GW, positioning us with one of the industry’s largest power development platforms. This deal not only enhances our operational and strategic flexibility but also supports our ambitious growth objectives in Bitcoin mining and HPC and AI.”

Mr. Kong added, “In June, we also successfully energized the first batch of Sealminers into our datacenters and began rigorous testing. Additionally, we completed the tape-out of our 14 J/TH SEAL02 chip and expect wafer delivery in Q3 2024. We remain on schedule to deploy 3.4 EH/s of our own ASIC technology into our datacenters in Texas and Tydal, Norway by the fourth quarter of 2024, bringing our total proprietary hash rate to 11.8 EH/s by year-end.”
