

Bitdeer Reports Unaudited Financial Results for the Third Quarter of 2025

- \$169.7 million revenue, up 173.6% year-over-year
- \$43.0 million adjusted EBITDA, up from negative \$7.9 million last year
- Expanding and accelerating AI strategy across multiple initiatives
- Achieved 41.2 EH/s of self-mining at the end of October, 2025
 - Commenced SEALMINER A3 mass production
- Early SEAL04 samples have demonstrated 6-7 J/TH power efficiency at the chip level under low-voltage, ultra-power saving mode

SINGAPORE, November 10, 2025 (GLOBE NEWSWIRE) -- Bitdeer Technologies Group (NASDAQ: BTDR) (“**Bitdeer**” or the “**Company**”), a world-leading technology company for Bitcoin mining and AI cloud, today released its unaudited financial results for the third quarter ended September 30, 2025.

Q3 2025 Financial Highlights

All amounts compared to Q3 2024 unless otherwise noted

- **Total revenue** was US\$169.7 million vs. US\$62.0 million.
- **Cost of revenue** was US\$128.9 million vs. US\$59.3 million.
- **Gross profit** was US\$40.8 million vs. US\$2.8 million.
- **Net loss** was US\$266.7 million vs. US\$50.1 million.
- **Adjusted EBITDA**¹ was US\$43.0 million vs. negative US\$7.9² million.
- **Cash and cash equivalents** were US\$196.3 million as of September 30, 2025.
- **Crypto balance**³: US\$246.2 million as of September 30, 2025.

Management Commentary

“Q3 marked a quarter of strong execution and financial performance,” said Matt Kong, Chief Business Officer at Bitdeer. “Revenue reached \$169.7 million, representing growth of 173.6% year-over-year and 9.1% sequentially. Gross profit rose to \$40.8 million, while adjusted EBITDA increased to \$43.0 million, reflecting operating leverage and efficiency gains driven by our self-mining expansion progress over the past year.”

Mr. Kong continued, “On the AI front, we have intensified our focus and investment to capture the surging global demand for compute. Leveraging our 3.0 GW power portfolio and deep expertise in developing and operating large-scale infrastructure, we are uniquely positioned to capitalize on this opportunity. The global shortage of AI infrastructure continues to deepen, and we expect this imbalance to persist through at least 2027. Under our

¹ “Adjusted EBITDA” is defined as earnings before interest, taxes, depreciation and amortization, further adjusted to exclude share-based payment expenses under IFRS 2, changes in fair value of derivative liabilities, changes in fair value of cryptocurrency-settled receivables and payables, changes in fair value of cryptocurrency receivables, and loss on extinguishment of convertible senior notes.

² Bitdeer revised definition of previously reported non-IFRS Adjusted Profit and Adjusted EBITDA and recast the prior period for comparability. This revision, which resulted in a US\$0.7 million and US\$0.6 million revision to Q3 2024 and first nine months of 2024 metrics, reflects non-cash fair value changes in cryptocurrency-settled receivables and payables as they do not represent normal operating expenses (or income) necessary to operate the business.

³ Including cryptocurrencies and cryptocurrencies receivables.

most optimistic outlook, allocating 200 MW of power capacity to AI cloud services could generate an annualized revenue run-rate exceeding \$2 billion by the end of 2026.”

Mr. Kong concluded, “In our ASIC business, as of the end of October, we achieved 41.2 EH/s, surpassing our 40 EH/s target that we set out at the beginning of the year. Mass production of the SEALMINER A3 series is underway, and early SEAL04 samples have demonstrated 6-7 J/TH power efficiency at the chip level under low-voltage, ultra-power saving mode. We are targeting mass production to begin in Q1 2026. Meanwhile, the development of our second-generation SEAL04 chip is significantly delayed.”

Operational Summary

Metrics	Three Months Ended September 30	
	2025	2024
Total hash rate under management (EH/s)	49.2	17.1
- Proprietary hash rate	35.0	8.6
- Self-mining	35.0	8.1
- Cloud Hash Rate	-	0.5
- Hosting	14.2	8.5
Mining rigs under management	241,000	165,000
- Self-owned	153,000	87,000
- Hosted	88,000	78,000
Bitcoin mined (self-mining only)	1,109	511
Bitcoins held	2,029	258
Total power usage (MWh)	1,656,000	828,000
Average cost of electricity (\$/MWh)	43	41
Average miner efficiency (J/TH)	20.1	31.4

Power Infrastructure Summary (as of October 31, 2025)

Q3 2025 Management's Discussion and Analysis (compared to Q3 2024)

Revenue

- **Total revenue** was US\$169.7 million vs. US\$62.0 million.
- **Self-mining revenue** was US\$130.9 million vs. US\$31.5 million, primarily due to the increase in the average self-mining hashrate for the quarter by 273.1% to 29.1 EH/s from 7.8 EH/s last year and higher year-over-year Bitcoin prices, offset partially by higher mining difficulty.
- **Cloud Hash Rate revenue** was US\$0.0 million vs. US\$7.1 million. The decline was primarily due to expiration of long-term Cloud hashrate contracts and subsequent reallocation of nearly all machines to self-mining operations by the end of 2024.
- **General Hosting revenue** was US\$8.4 million vs. US\$9.6 million. The decline was primarily due to the expiration of certain hosting customer contracts as well as the removal of older and less efficient machines by other hosting customers, and these capacities have been reallocated for self-mining business.
- **Membership Hosting revenue** was US\$14.0 million vs. US\$9.9 million. The increase was primarily driven by

⁶ Figures may not add due to rounding.

customers replacing older machines with newer ones.

- **SEALMINER sales revenue** was US\$11.4 million.
- **HPC and AI Cloud revenue** was US\$1.8 million.

Cost of Revenue

- **Cost of revenue** was US\$128.9 million vs US\$59.3 million. The increase was primarily driven by higher electricity usage associated with the increased average operating self-mining hashrate for the quarter, costs of SEALMINERs sold to external customers, and depreciation expense.

Gross Profit and Margin

- **Gross profit** was US\$40.8 million vs. US\$2.8 million.
- **Gross margin** was 24.1% vs. 4.5%. The improvement in gross margin was primarily due to higher self-mining revenue and improved fleet efficiency.

Operating Expenses

- Operating expenses were US\$60.5 million vs. US\$42.9 million.
 - Selling expenses were US\$1.3 million vs. US\$2.2 million, down 42.4% year-over-year, primarily due to a decrease in share-based payment expenses for sales personnel and marketing expenses.
 - General and administrative expenses were US\$20.1 million vs. US\$15.8 million, up 27.0% year-over-year, primarily due to the increase in staff costs for general and administrative personnel and consulting fees.
 - Research and development expenses were US\$39.1 million vs. US\$24.8 million, up 57.4% year-over-year, primarily due to the one-off development and tape out costs of SEAL04 chip, and non-cash amortization expenses of intangible assets related to the acquisition of FreeChain incurred since Q4 2024.

Other Net Loss

- Other net loss was US\$238.5 million primarily due to the non-cash, fair value changes of derivative liabilities, which were US\$247.6 million of loss on fair value changes for the convertible senior notes.

Net Loss

- Net loss was US\$266.7 million vs. US\$50.1 million.

Adjusted Loss (Non-IFRS)⁷

- Adjusted loss was US\$32.8 million vs. US\$25.6² million. The increase in loss was primarily due to higher operating expenses and interest expenses relating to the increased borrowings, partially offset by the year-over-year higher revenue and gross profit margins.

Adjusted EBITDA (Non-IFRS)

- Adjusted EBITDA was US\$43.0 million vs. negative US\$7.9² million. The year-over-year growth was primarily driven by significantly higher self-mining hashrate as a result of the Company's mass production and deployment of SEALMINERs A1 and A2 during 2025.

Cash Flows

- Net cash used in operating activities was US\$520.3 million, primarily driven by SEALMINERs supply chain and manufacturing costs, electricity costs from the mining business, general corporate overhead and interest

⁷"Adjusted profit/(loss)" is defined as profit/(loss) adjusted to exclude share-based payment expenses under IFRS 2, changes in fair value of derivative liabilities, changes in fair value of cryptocurrency-settled receivables and payables, changes in fair value of cryptocurrency receivables, and loss on extinguishment of convertible senior notes.

expenses.

- Net cash generated from investing activities was US\$27.2 million, which was driven by US\$59.7 million of capital expenditures, of which US\$31.6 million related to data center infrastructure and related construction. Proceeds from disposal of cryptocurrencies from principal business was US\$89.0 million.
- Net cash generated from financing activities was US\$388.2 million, primarily driven by approximately US\$320.0 million of borrowings from a related party and US\$91.4 million of proceeds from shares sold under ATM program, partially offset by US\$48.3 million of repayments of borrowings.

Capex

- 2025 global power and data center infrastructure capex is expected to be in the range of US\$210 to US\$240 million.

Balance Sheet

As of September 30, 2025 unless stated otherwise (compared to December 31, 2024)

- US\$196.3 million in cash and cash equivalents, US\$246.2 million in crypto balance³ and US\$824.3 million in borrowings.
- US\$593.2 million prepayments and other assets, up from US\$310.2 million. Change primarily driven by advanced payments to suppliers for SEALMINER mass volume production.
- US\$231.5 million inventories, up from US\$64.9 million. Increase driven by wafers, chips, WIP and finished SEALMINER inventory.
- US\$672.5 million derivative liabilities mainly due to convertible senior notes issued in 2024 and 2025.

Further information regarding the Company's third quarter 2025 financial and operations results can be found on the SEC's website <https://sec.gov> and the Company's Investor Relations website <https://ir.bitdeer.com>.

About Bitdeer Technologies Group

Bitdeer is a world-leading technology company for Bitcoin mining and AI cloud. Bitdeer is committed to providing comprehensive Bitcoin mining solutions for its customers. Bitdeer handles complex processes involved in computing such as equipment procurement, transport logistics, data center design and construction, equipment management, and daily operations. Bitdeer also offers advanced cloud capabilities to customers with high demand for artificial intelligence. Headquartered in Singapore, Bitdeer has deployed data centers in the United States, Norway, and Bhutan. Use of Non-IFRS Financial Measures

In evaluating the Company's business, the Company considers and uses non-IFRS measures, adjusted EBITDA and adjusted profit / (loss), as supplemental measures to review and assess its operating performance. The Company defines adjusted EBITDA as earnings before interest, taxes, depreciation and amortization, further adjusted to exclude share-based payment expenses under IFRS 2, changes in fair value of derivative liabilities, changes in fair value of cryptocurrency-settled receivables and payables, changes in fair value of cryptocurrency receivables, and loss on extinguishment of convertible senior notes, and defines adjusted profit/(loss) as profit/(loss) adjusted to exclude share-based payment expenses under IFRS 2, changes in fair value of derivative liabilities, changes in fair value of cryptocurrency-settled receivables and payables, changes in fair value of cryptocurrency receivables, and loss on extinguishment of convertible senior notes.

The Company presents these non-IFRS financial measures because they are used by its management to evaluate its operating performance and formulate business plans. The Company also believes that the use of these non-IFRS measures facilitate investors' assessment of its operating performance. These measures are not necessarily comparable to similarly titled measures used by other companies. As a result, investors should not consider these measures in isolation from, or as a substitute analysis for, the Company's profit or loss for the periods, as determined in accordance with IFRS. The Company compensates for these limitations by reconciling these non-IFRS financial measures to the nearest IFRS performance measure, all of which should be considered when evaluating its performance. The Company encourages investors to review its financial information in its entirety and not rely on a single financial measure.

The following table presents a reconciliation of profit/ (loss) for the relevant period to adjusted EBITDA and adjusted loss, for the three and nine months ended September 30, 2025 and 2024.
